EcoPure

The Natural Choice for Sports

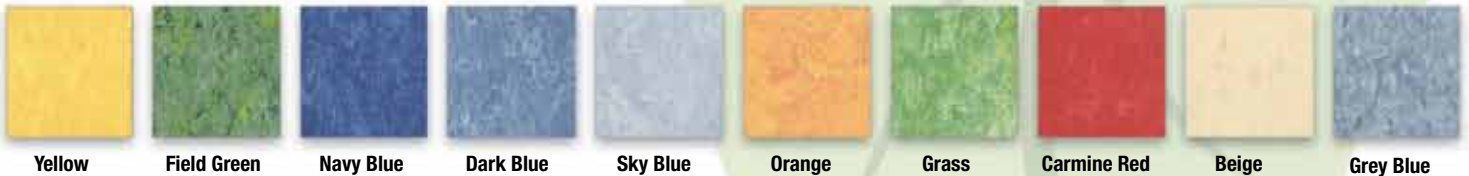

EcoPure, the latest sports surfacing innovation from Tarkett Sports, incorporates linseed oil, cork, wood flour, rosin, limestone, a revolutionary absorbent foam backing and an award winning XF finish to create the most natural, long lasting and easy to maintain sports surface in the world!

Benefits

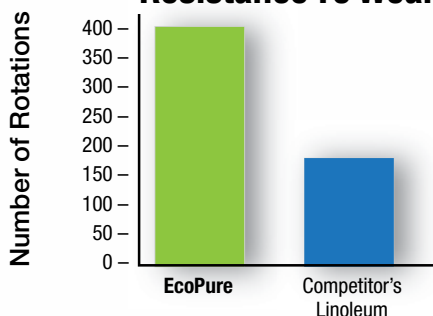

- The most natural sports surface on the market.
- Only Linoleum surface to incorporate shock absorbing foam backing for sports.
- XF finish is very easy to maintain, contributing to drastically reduced maintenance costs and resource consumption (water, detergent & energy).
- XF finish is the most resistant to abrasion for maximum durability and longevity.
- 8 Year 3rd Party Insured Warranty provides for best protection in the business.
- Product is naturally bacteriostatic.
- Contributes to LEED Credits.
- Available in a wide range of colors.

A - XF Finish
B - Linoleum Core
C - Jute Underlayment
D - Foam Backing

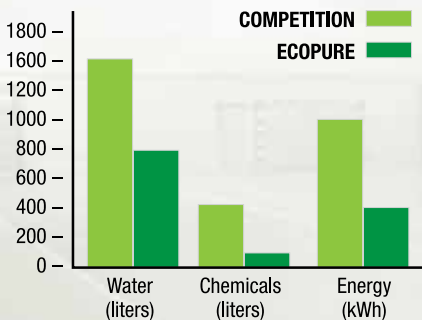

Resistance To Wear

The abrasion resistance and durability of EcoPure shows remarkable results when compared to other resilient flooring options. Surface treatment loss is measured in a modified Taber test, where a wheel covered with abrasive emery paper and loaded with a 1kg weight is rotated on the surface. When the surface treatment is worn out, the number of revolutions is recorded.

Characteristics	EcoPure
Total Thickness - EN 428/EN 429	4.6 mm (.181")
Width - EN 426	6'6" (2 m)
Roll Length - EN 427	85 ft. (26 m approx.)
Weight - EN 430	.96lb/sq.ft. – 10.36 lbs/ m ²
Surface Texture	Slight
Surface Treatment	XF® X-treme Performance Protection
Anti-Fungal/Sanitization	Naturally Bacteriostatic
Shock Absorption - ASTM F2772	Category 1
Vertical Deformation - EN 14809	0.6
Ball Rebound - ASTM F2772	>90%
Friction - EN 13036 - 4	83
Formaldehyde Emission - EN 717-1/EN 717-2	No Formaldehyde
Recycled Content	22%
Maintenance	See Guidelines
Warranty	3rd Party Insured (8 Years)
See current maintenance guidelines for more information	

Resource Consumption

With a strong commitment to the environment, EcoPure can help reduce the consumption of water, detergent and energy by up to 50% simply by reducing its need for intense maintenance.

Saving on Maintenance

Thanks to EcoPure's easy to maintain XF finish, cleaning and maintenance costs can be reduced by as much as 30%. A 10 year comparison between EcoPure and other non-XF treated surfaces over an area of approximately 10,000 square feet revealed maintenance savings over \$80,000.

Tarkett's Linoleum XF wins 2009 Green Good Design™ Award

Tarkett's new linoleum XF collection was awarded a 2009 Green GOOD DESIGN™ award in the product/industrial design category, as presented by The European Centre for Architecture Art Design, and the Chicago Athenaeum: Museum of Architecture and Design. Products were judged on their ability to promote energy savings, recycling and greater sustainability in all sectors of industry. Tarkett's revolutionary XF surface treatment reduces environmental impact by using significantly less water, chemicals and energy in maintenance and is highly resistant to soiling and abrasion.
