COMFORT

# Environmental Facts

## Dropzone Rubber Fitness Flooring

Sustainability at Tarkett is based on Cradle to Cradle® principles. This approach to design attempts to create a sustainable loop of production, use, and reuse, with minimal environmental effect and optimal product performance in the process. To achieve these goals, Tarkett divides the product life cycle into four groups: good materials, resource stewardship, People-Friendly Spaces, and Reuse and Recycle. The ways in which Dropzone Comfort embodies these individual goals are outlined here.

- Carefully managed quality of raw materials
- Controlled to exclude ferrous metals and contaminants

- Manufacturing uses post-consumer recycled tires
- Managed water and energy consumption in production
- Manufacturing utilizes scrap material to reduce waste

- Low VOC emissions
- Requires no harsh chemicals to maintain
- Utilizes a solvent-free CRI Green Label certified adhesive

- 100% recyclable*
- 92% total recycled content
- Recycled content helps divert material from landfills

*Recycling facilities may not exist in your area. Transportation of the material may be required.
